

Light Source - LHT50/LHT75

Tungsten-Bromine Lamp Light Source Chamber

The LHT50/LHT75 tungsten light source is compatible with OSRWM bulbs to output radiation in the range 350 to 2500 nm. The luminous flux is reliable with performance falling to 98% at the end of a bulb's lifetime. Power supply fluctuation is only 0.12%. Bulb lifetime is approximately 2000 hours. System includes variable brightness control, forced air-cooling, and compatible AC power supply.
