

Dome lights

The dome lights are available in a wide range of sizes.

Dome lights provide highly shadow-free lighting in small working distances and avoid reflection from reflective objects more than ring lights.

In order to prevent a "camera hole shadow" it is possible to use a coaxial light together with the dome light.

Brackets are included (no. SXX3 010213, for details see bracket options) except for SAX3 2044.

As an option the camera hole can be covered by an adapter to reduce the hole size.
