

Micro-Spectroscopy Seminar

Attend our free seminar to learn more about Infra-Red,
Raman and Electron Microscopy

- Learn how the combination of FTIR and/or Raman microscopy and SEM can provide a holistic insight into a materials' structure-function relationship from both the chemical and the morphological standpoints.
- Speak with the experts to help understand challenging applications
- Get the latest information on Applications such as Micro-Plastics, Battery Technology, Composites, Pharmaceuticals and many more

Date & Time: **Wednesday, May 22nd, 2019**
09:00 – 16:00

Location: **The Merchants House of Glasgow**
7 West George Street
Glasgow
G2 1BA

For more information, contact salman.sheikh@thermofisher.com

Register at thermofisher.com/meettheexpert

The registration includes the seminar, lunch and snacks/beverages during the breaks

Agenda

09:00 - 09:30	Registration and Coffee
09:30 - 09:45	Welcome and Introduction
09:45 - 11:00	Principles and Applications of FTIR Microscopy
11:00 - 11:30	Tea/Coffee
11:30 - 12:45	Principles and Applications of Raman Microscopy
12:45 - 13:45	Lunch
13:45 - 15:00	Principles and Applications of Scanning Electron Microscopy
15:00 - 15:15	Tea/Coffee
15:15 - 16:00	Meet the Experts and SEM Demo analysis
16:00 - 16:15	Q&A and Wrap Up

Venue address

Merchants House of Glasgow,
Collectors Office, 7 W George St, Glasgow G2 1BA
